EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney Deborah L. Lu on 5/10/05-5/11/05.

The application has been amended as follows:

In the claims

Claims 10, 20-21 and 28-35 are cancelled, and claims 1 and 12 have been amended as follows without prejudice, without admission, without surrender of subject matter, and without any intention of creating any estoppel as to equivalents.

Claim 1 (Currently amended) A method of increasing the ability of an adenovirus to transduce a specific cell type relative to an unmodified adenovirus, comprising the step of: modifying a gene encoding an adenoviral capsid protein by introducing a DNA sequence encoding a single chain antibody into ~~either the 5' end of the minor capsid protein pIIIa gene or the 3' end of the minor capsid protein pIX gene,~~ wherein said modification increases the ability of said adenovirus to transduce a specific cell type relative to an unmodified adenovirus.

Claim 12 (Currently amended) A method of killing tumor cells in an individual, said method comprising the steps of: injecting directly to said tumor cells an effective amount of recombinant adenoviruses comprising a therapeutic gene encoding a protein that converts a non-toxic compound to a toxic compound and a gene encoding a pIIIa protein or a pIX protein modified by introducing a single chain antibody into the N-terminus of said pIIIa protein or the C-terminus of said pIX protein; and treating said individual with said non-toxic compound.

Art Unit: 1636

REASONS FOR ALLOWANCE:

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or fairly suggest a method of increasing the ability of an adenovirus to transduce a specific cell type relative to an unmodified adenovirus and a method of killing tumor cells in an individual as claimed. Accordingly, the claims are allowable over the prior art of record.
